Withdrawal Treatment

Prayer!!! Water!!! Warm baths every day!!! Lemon in all your water if you can tolerate it!!!
Charcoal Poultice over the Liver every day x 2 weeks. Herbal Formula Tea with 3 herbs for the Liver and 2 for the blood (this is to detox the Liver).

Have her fast for 2 days and go on the 2 Month Program

Charcoal Poultices and Castor Oil poultices for any Liver issue.

If there are withdrawal problems, always think of the Liver, for this is the filter for every poison that is entered into the body.

ALSO:

Do a COLD SHEET WRAP for the Withdrawal treatment. It gets the poison out of the body quickly.

Have someone help you. Take have a bucket of cold water with a sheet that is full sized or bigger. Also have socks for them, and a wool blanket or other large blanket laying over their bed so they can just lie in it and get wrapped after having the cold sheet wrap put around them.

FOR THE COLD SHEET WRAP:

1. Have them stand in the shower undressed.
2. Dip the sheet in the cold water and wring out well.
3. Have them put their arms straight in the air and start wrapping from the top of the torso, then after one wrap, have them put one arm down, and wrap around again, and then the other arm, and wrap again, all the way down the body.
4. Have them step out of the bath.
5. Put socks on them, and have them lay on the wool blanket and cover them well.
6. Give them water to drink and put a cool rag on their head, as this can really heat them up.

Have them lay in this for 1-1½ hours.

This will remove medications, drugs, and alcohol quickly from the system.

This is also a great replacement for chemotherapy.

Do this to them a couple of days in a row.

When someone is going through withdrawals, they need to detox.

The best liquid for detoxing the body is not vegetable juice, but is pure soft water.

“Water is the best liquid possible to cleanse the tissues.” {CD 420.1}

Think of water inside the body and water outside the body. Not only drinking but bathing in it and doing the cold sheet wrap.

They need plenty of water because withdrawals can cause headaches.

Also, many vomit while going through withdrawals, so activated charcoal is great to have on hand.

Also think of the liver as the filtering system for all drugs, caffeine, and anything else put in the body. It passes through the liver, so the liver needs to be cleansed.

Any addict has poisoned blood, so 1 herb for the blood and 2-3 for the liver.

Plus the poultices I told you about.

Plus Bible Promises

This is not me I'm just giving a testimony about someone else

I know what it is to go through serious withdrawals, and you feel like you are literally going to

die. When I got off of cigarettes one time back in august 2003, just a few months after my husband passed, I was in bed for 3-4 days and vomited the whole time, my stomach felt like someone was cutting it out. I had the shivers, shakes, etc. I did the cold sheet wrap on myself and it actually made me much better. I didn't have the strength to do anything else, and my kids were all too small at that time to really do anything for me.

Praise God I got through it because it surely felt like death. I smoked 3 packs of Newport menthol every day for years.

God can give you the power to overcome that just trust him.
